DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121:

Group I, claims 1-10, drawn to apparatus with a special drive (e.g., CD drive) which is interfaced with another hardware unit whereby the drive and the other hardware unit works to configure data and to send data to play the data to the user – involving a hardware data drive ready to play, which would be a way of accessing storage device, class 711, subclass 111.

Group II, claims 11-12, drawn to a method in which the software processing is done so as to encrypt and decrypt data -- involving programming with an algorithm, which would be a way of access control by authorizing data, class 726, subclass 30.

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-IV have separate utility such as the cited subject matter to which they have been drawn (e.g., CD-drive as mentioned and algorithm as mentioned). See MPEP § 806.05(d). Because these inventions are distinct for the reasons given above and each of the search required for each of the separate Groups I-IV is not required for the other Groups among them, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
